Discriminating tenants select Skender Interiors Group to construct interior spaces for a wide range of projects, including corporate, technology and data centers, law, financial, and trading firms, as well as retail. A philosophy of hands-on management by recognized industry leaders assures each client full access and open communication throughout the project lifecycle. Throughout the metropolitan Chicago market area, this commitment continues to build long-term client relationships based on our ability to execute creative construction solutions for intricate design concepts.

“As one of Chicago’s largest buildouts in 2007, our project presented challenges, including a tight 22-week timetable. Skender responded with innovative solutions. Thanks for guiding us through the green building process to ensure we were on track for LEED-certification.”
